EGLĖ MIELIAUSKIENĖ

is a founder of EgliDesign and creator of all the artistic pieces. She believes that her created furniture should serve as a work of art in the interior, and calls it “functional sculpture”. Her works tell stories, and their very presence inspires surprising trains of thought. Egli is a novel that everyone can read in their own way… a neverending story, presented aesthetically, that invents itself through sensations and sight. This is how Egle fools time itself. These are not mass-produced products – they are made for people and for their souls. They are objects which will become lifelong companions.
